

Readers expect every title in every format, the day it launches

Get books to readers faster, in every format

Six Red Marbles helps trade publishers keep every title moving from manuscript to marketplace, in print, digital, and born-accessible editions. You get the flexibility of a dedicated partner with the operational rigor of an enterprise-scale provider, working as an extension of your production team.

As reader expectations and accessibility standards keep rising, the right production partner becomes a publishing advantage. Here is how we help you deliver on both.

— WHAT WE DO

COMPOSITION, DESIGN & TEMPLATES

We design, typeset, and compose titles for hardcover, paperback, mass-market, large-print, and digital-first releases, and build reusable series templates, all to each imprint's standards.

EPUB & DIGITAL DISTRIBUTION

We produce standards-compliant EPUB3 and structured digital outputs, optimized for retail, library, and direct-to-consumer channels worldwide.

ACCESSIBILITY & COMPLIANCE

We prepare and remediate compliant files, built into production rather than bolted on. Born-accessible workflows and AI-assisted alt text with human review keep every edition usable from day one.

BACKLIST CONVERSION & REISSUE

We convert and re-master backlist into current digital and accessible formats at scale, turning older catalogs into new, distribution-ready revenue.

IMAGE & ART PROCESSING

We create, correct, redraw, and color-manage images for illustrated and complex titles, keeping visuals consistent across every format.

EDITORIAL & PRE-PRODUCTION

We handle copyediting, proofreading, alt-text writing, and language tagging: editorial precision that protects author intent and the reader's experience.

— WHY TRADE PUBLISHERS CHOOSE SRM

A RIGHT-SIZED PARTNER

You get the flexibility of a dedicated partner with the operational rigor of an enterprise-scale provider. Every engagement earns senior-level attention and works directly with your team, not a ticket queue.

BUILT FOR PUBLISHING OPERATIONS

We track acquisition schedules, launch dates, seasonal lists, and retail deadlines, working as an extension of your production organization so your pub dates hold.

DIGITAL-FIRST AND ACCESSIBILITY-LED

Every title is built for print, digital, and accessible formats from the start, meeting EPUB3, WCAG, and NIMAS standards. AI-assisted tooling, always paired with expert human review.

GLOBAL DELIVERY, LOCAL ACCOUNTABILITY

A US and UK front door with established India-based production gives you parallel workflows, round-the-clock coverage, and responsive communication: capacity that flexes with your season.

— PROOF IN ACTION

845 pages to market in 24 hours

A leading trade publisher came to us with an 845-page title to convert, validate, and make distribution-ready in a single day, ahead of a high-profile release. We split the work across time zones and held every validation checkpoint. Delivered in 24 hours, with zero rework.

5,366 titles validated on deadline

Working to a fixed, non-negotiable deadline, we validated and remediated a 5,366-title EPUB catalog using an automation-driven framework inside disciplined quality checkpoints. The full catalog shipped on time, with a major reduction in manual effort and zero overruns.

Accessibility that reads naturally

A publisher needed every non-English word tagged for screen readers under WCAG. Our AI-assisted tagging, refined by human review to skip common loanwords, delivered full compliance without disrupting the reading experience.

Global reach, local accountability. A US and UK front door, backed by global production, helping trade publishers deliver to readers book after book.
